

# steemchurch

*The first ever "church of the blockchain"*

2 March 2019

We regret to advise that our initial application for WP funding was lodged incorrectly. We failed to place the additional '0000' as required by the blockchain and as such we were requesting a mere 1.5 TLOS per cycle.

However, we the parishioners of the SteemChurch are pleased to announce that we are now resubmitting our initial proposal, in the correct manner.

There have been no changes to our plan. We continue in our mission to onboard hundreds, then thousands, of underprivileged people of the world onto our Telos blockchain. Affording many talented and creative persons new opportunity for decentralised trade and commerce, along with the establishment of supply networks – outside of their current failing political and economic systems.

We continue to request a sum 15,000 TLOS per month for 6 months, to fund the referral program, the onboarding process, blockchain participation and ongoing community development. Full details of our background and the expansion specifics are discussed in the proposal, which can be found at the following links:

**Telegram** - <https://t.me/steemchurch>

**Steemit** - <https://steemit.com/steemchurch/@sirknight/steemchurch-telos-worker-proposal-001>

We thank everyone who has voted in favour of our expansion onto Telos. We hope that you will vote YES on this resubmission proposal too.

When considering our proposal, please think not of the impact this initiative might have on you personally, tomorrow. Instead, consider the benefits we might bring to many thousands, perhaps millions of people worldwide and for generations to come. Together we can make a difference.

Be well Telos friends.

**SIRKNIGHT**
